BC846 THRU BC849

Small Signal Transistors (NPN)

SOT-23 <u>122 (3.1)</u> <u>111 (3.0)</u> <u>111 (3.0)</u>

Pin configuration 1 = Base, 2 = Emitter, 3 = Collector.

FEATURES

- NPN Silicon Epitaxial Planar Transistors for switching and AF amplifier applications.
- Especially suited for automatic insertion in thick- and thin-film circuits.

♦ These transistors are subdivided into three groups A, B and C according to their current gain. The type BC846 is available in groups A and B, however, the types BC847 and BC848 can be supplied in all three groups. The BC849 is a low noise type available in groups B and C. As complementary types, the PNP transistors BC856...BC859 are recommended.

MECHANICAL DATA

Case: SOT-23 Plastic Package Weight: approx. 0.008 g Marking code
