

LCD Display: Voltage Percentage Time
6-60V Lithium Batteries for Any Battery

Charging Mode: Used for Battery Charging Control

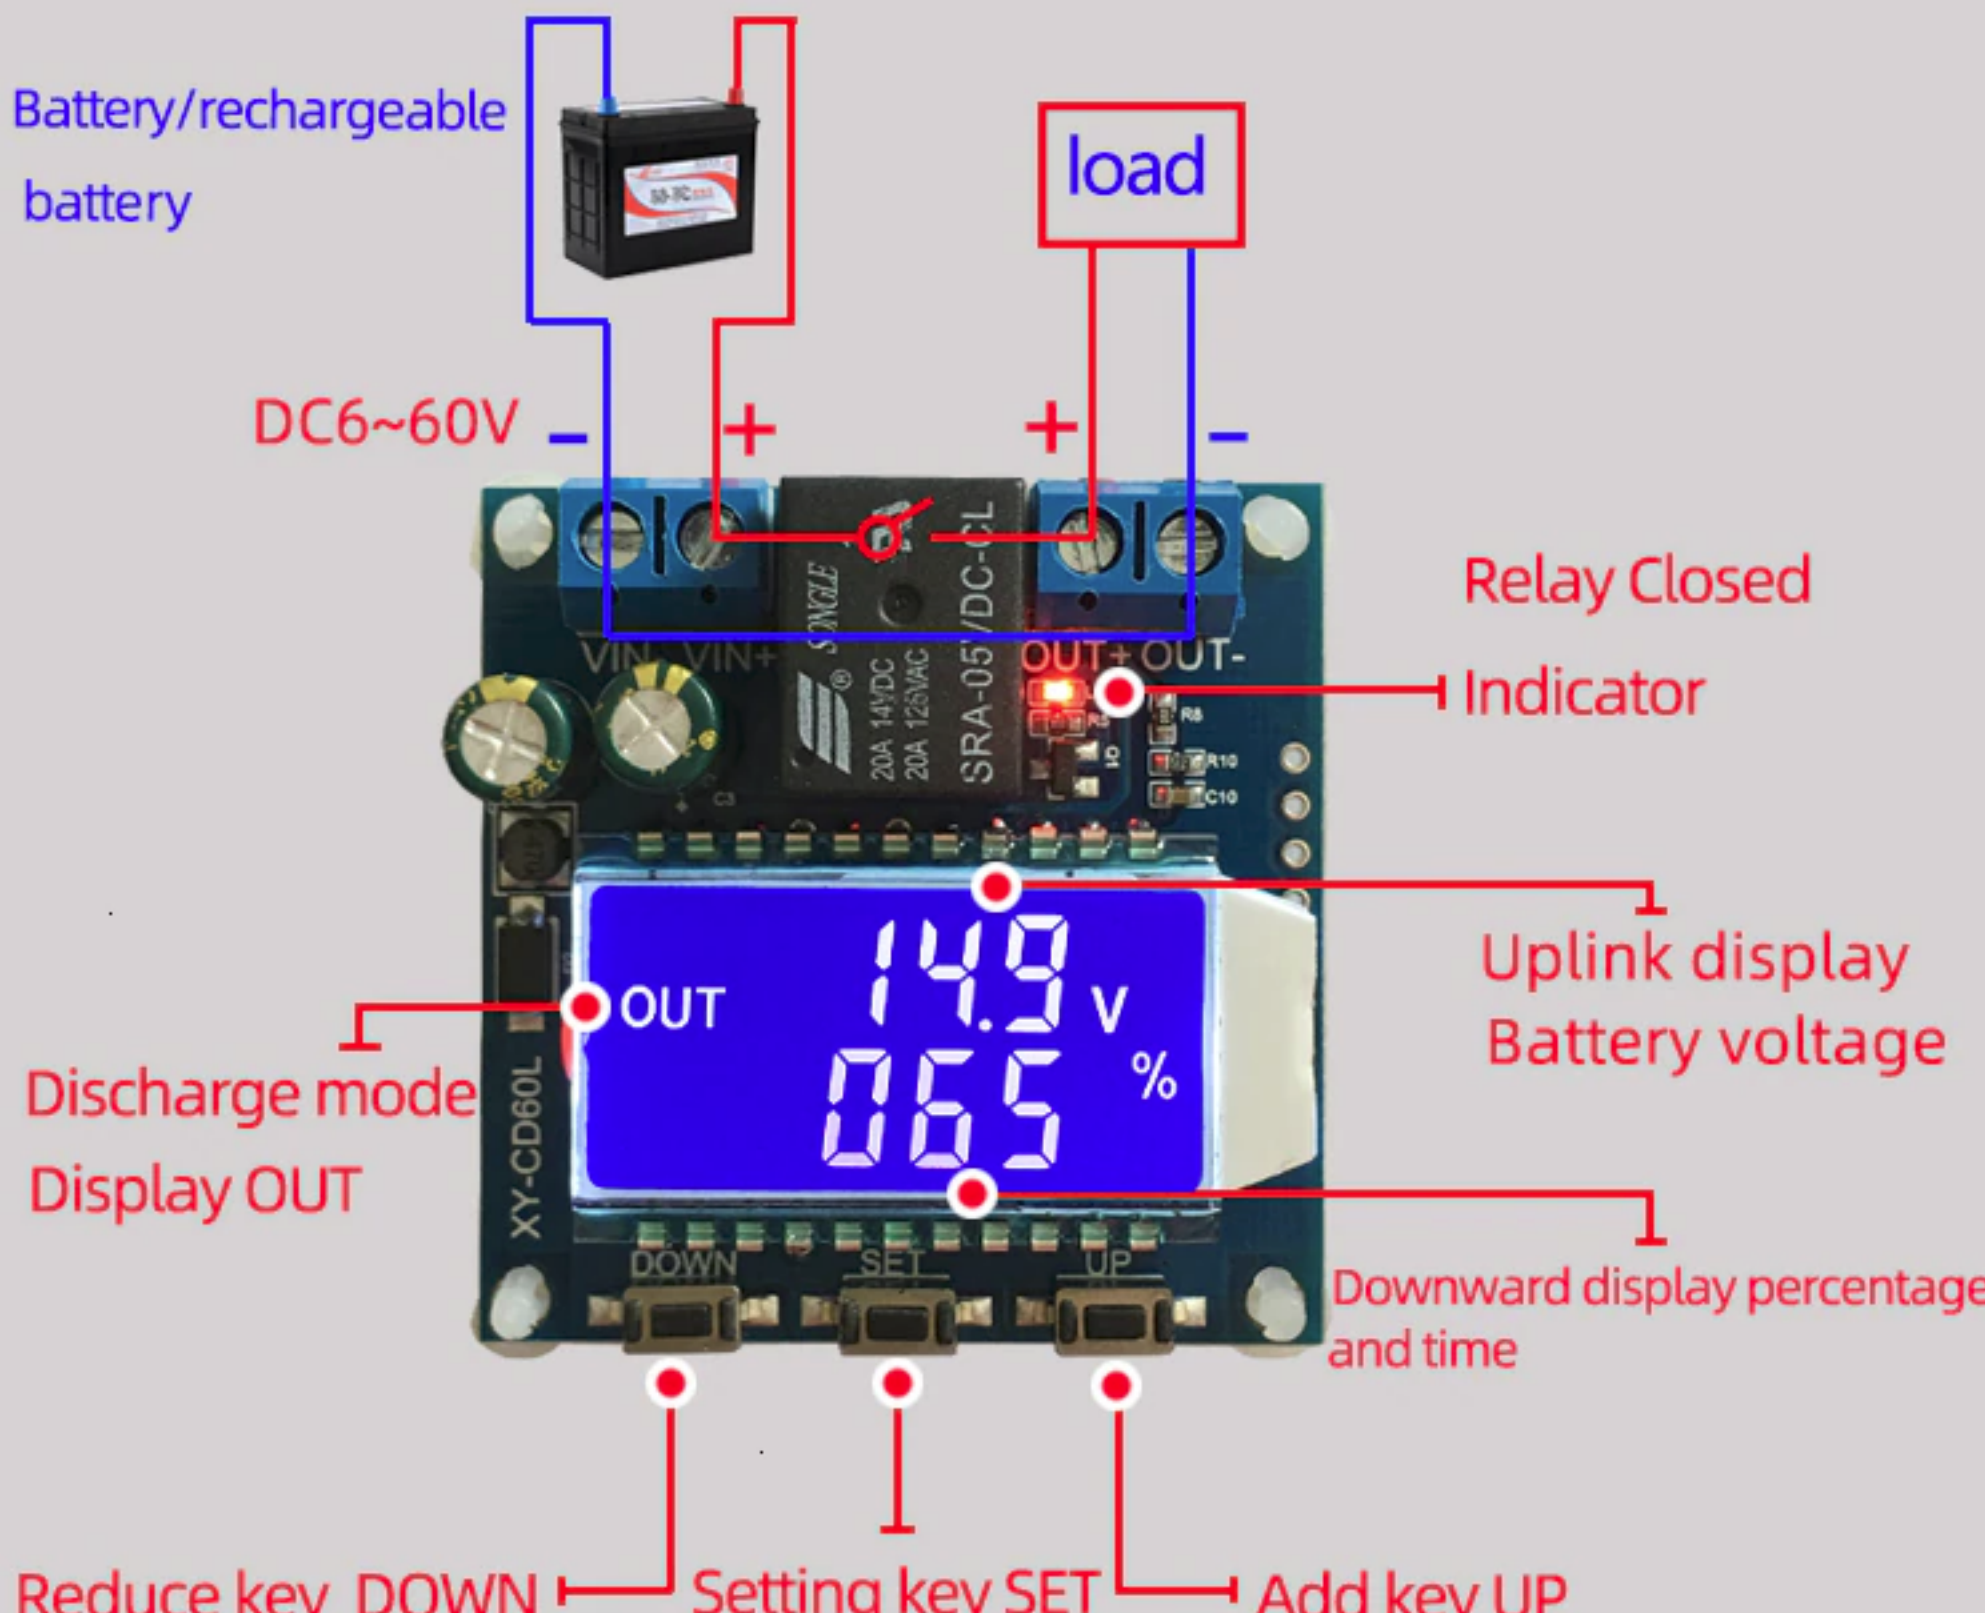

Charging time

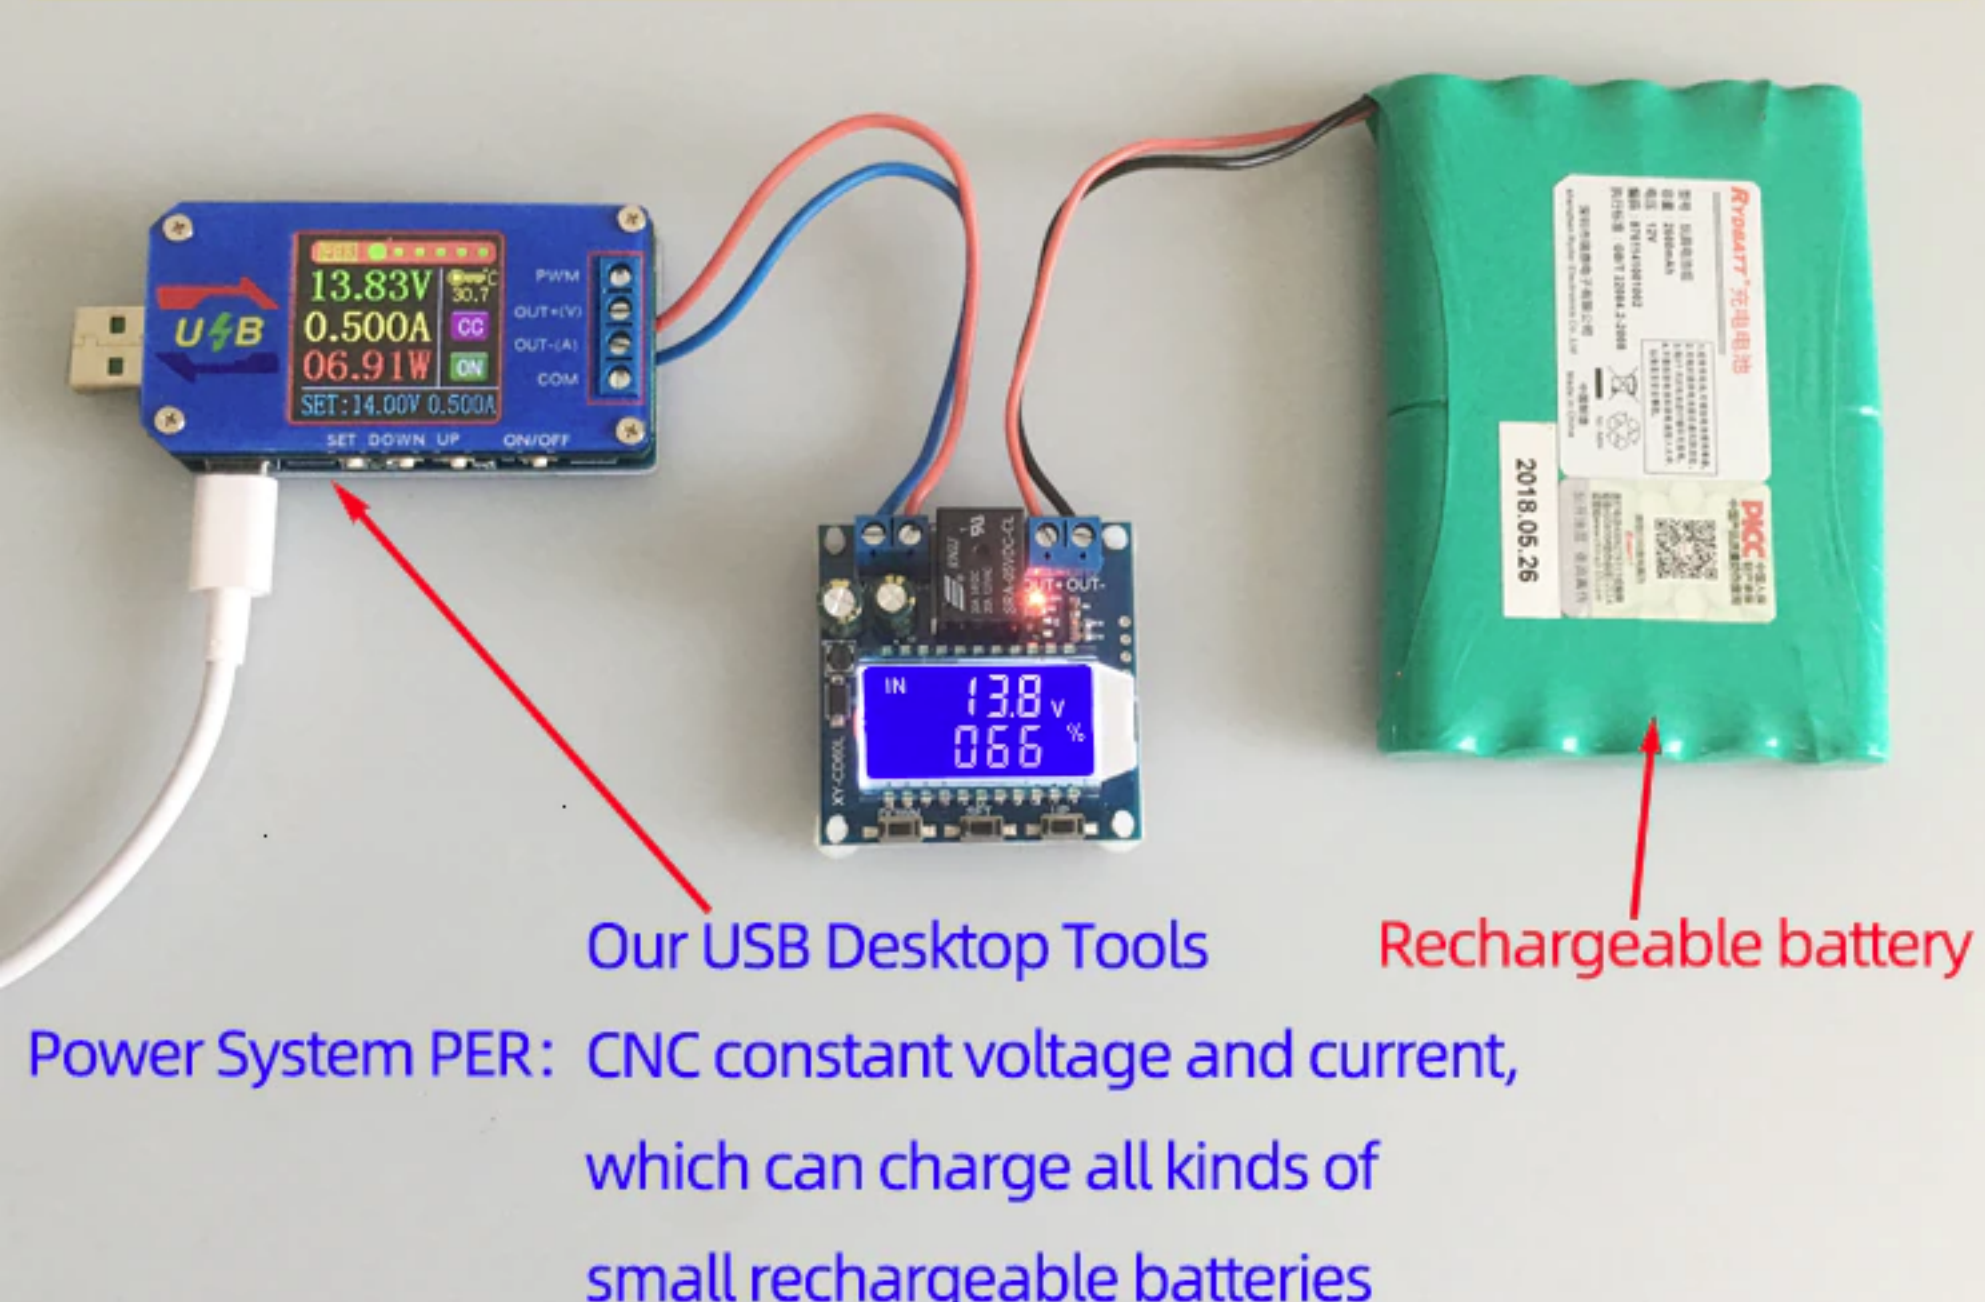

Battery-free access display
nbE

**Discharge mode: Low Voltage Protection/Low Voltage Protection for Batteries
Effective prolongation of battery life/DC voltage protector**

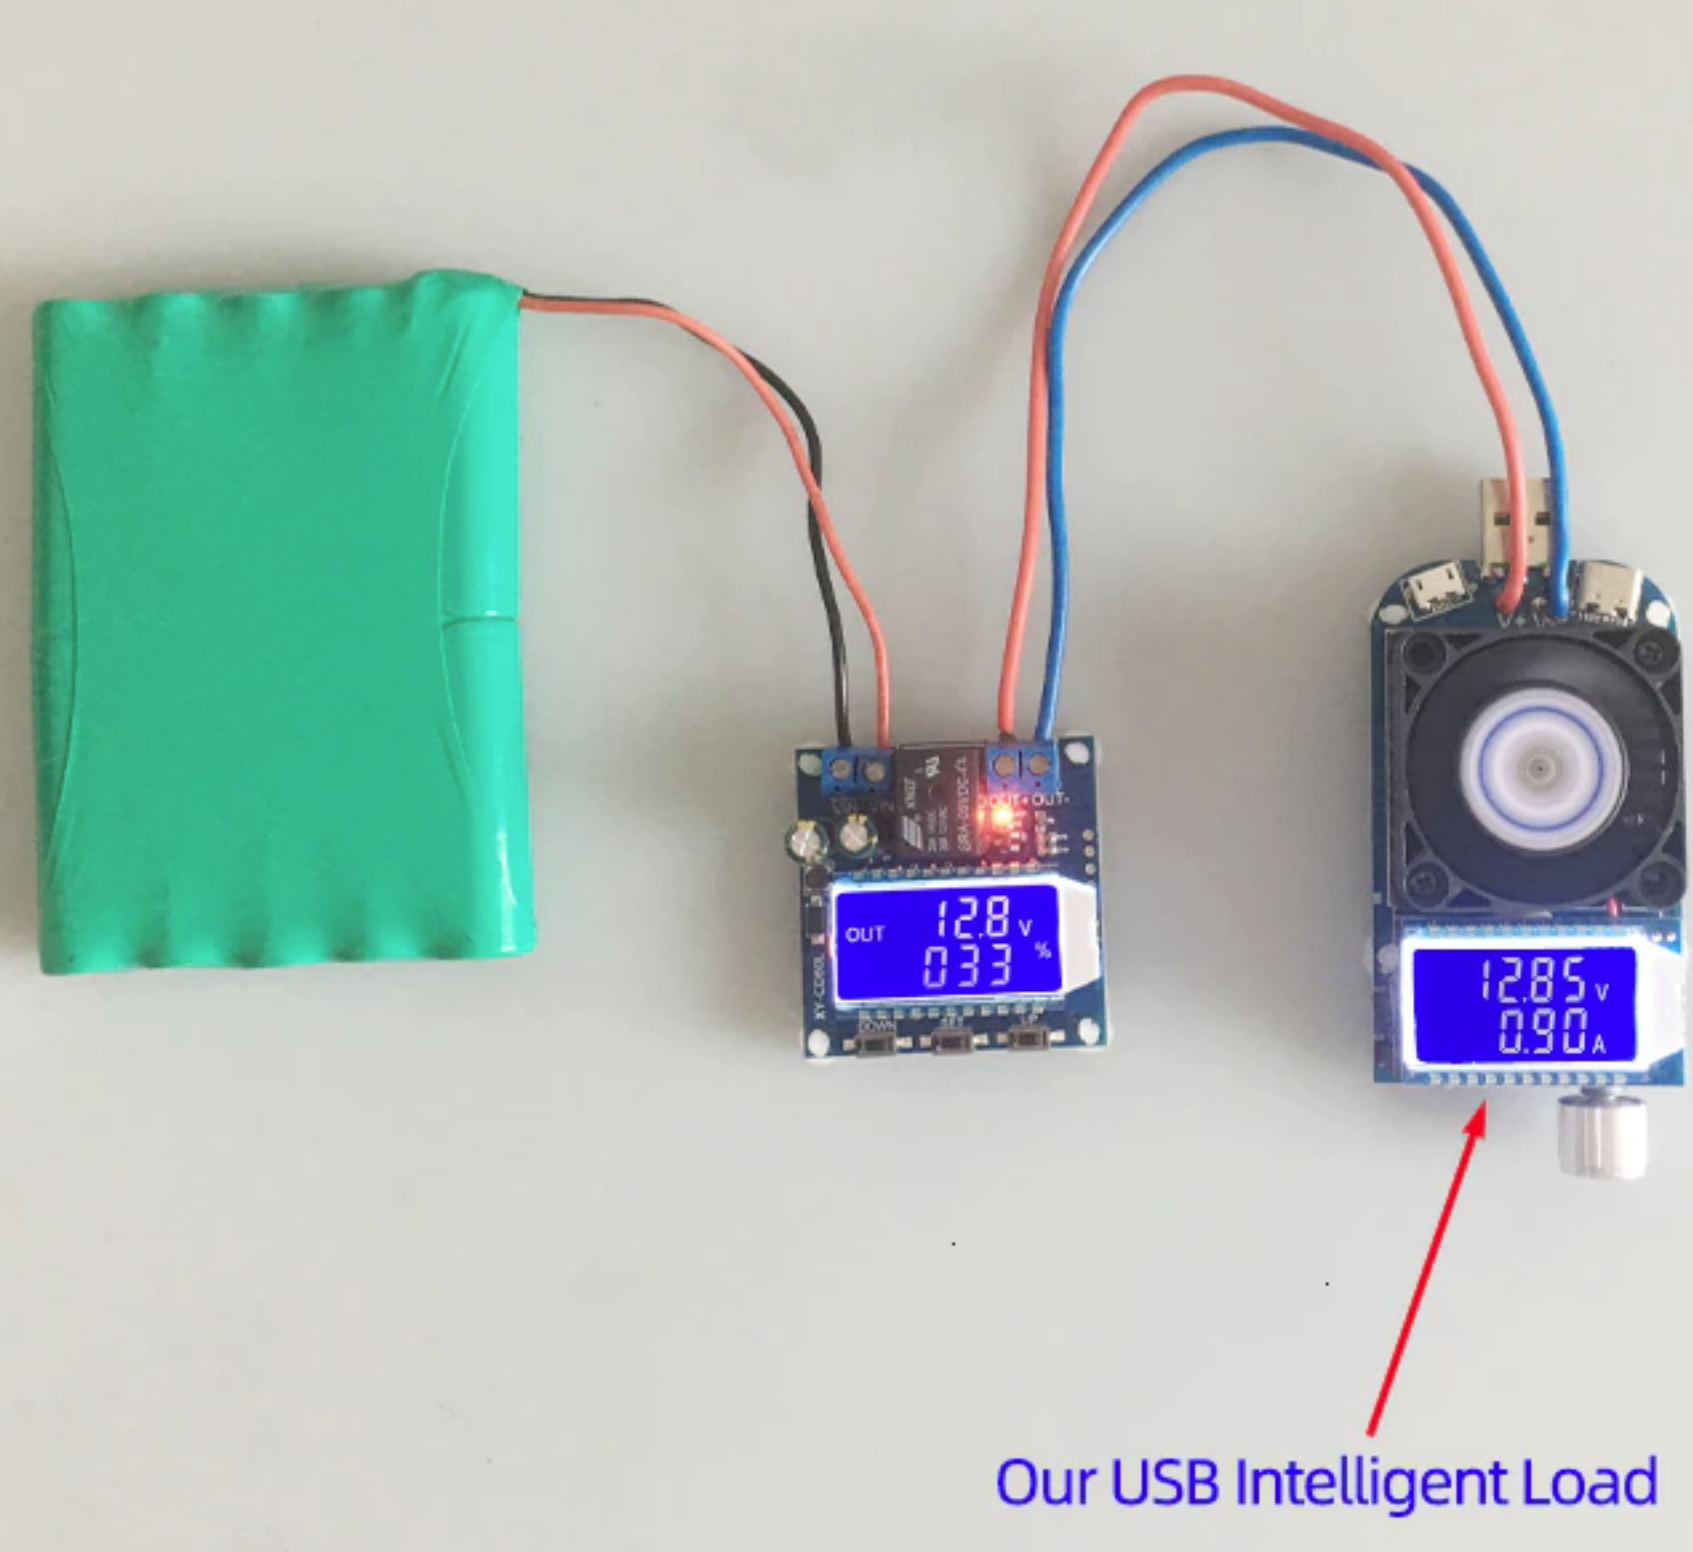

Time

Physical Chart of Battery Charging Control Connection

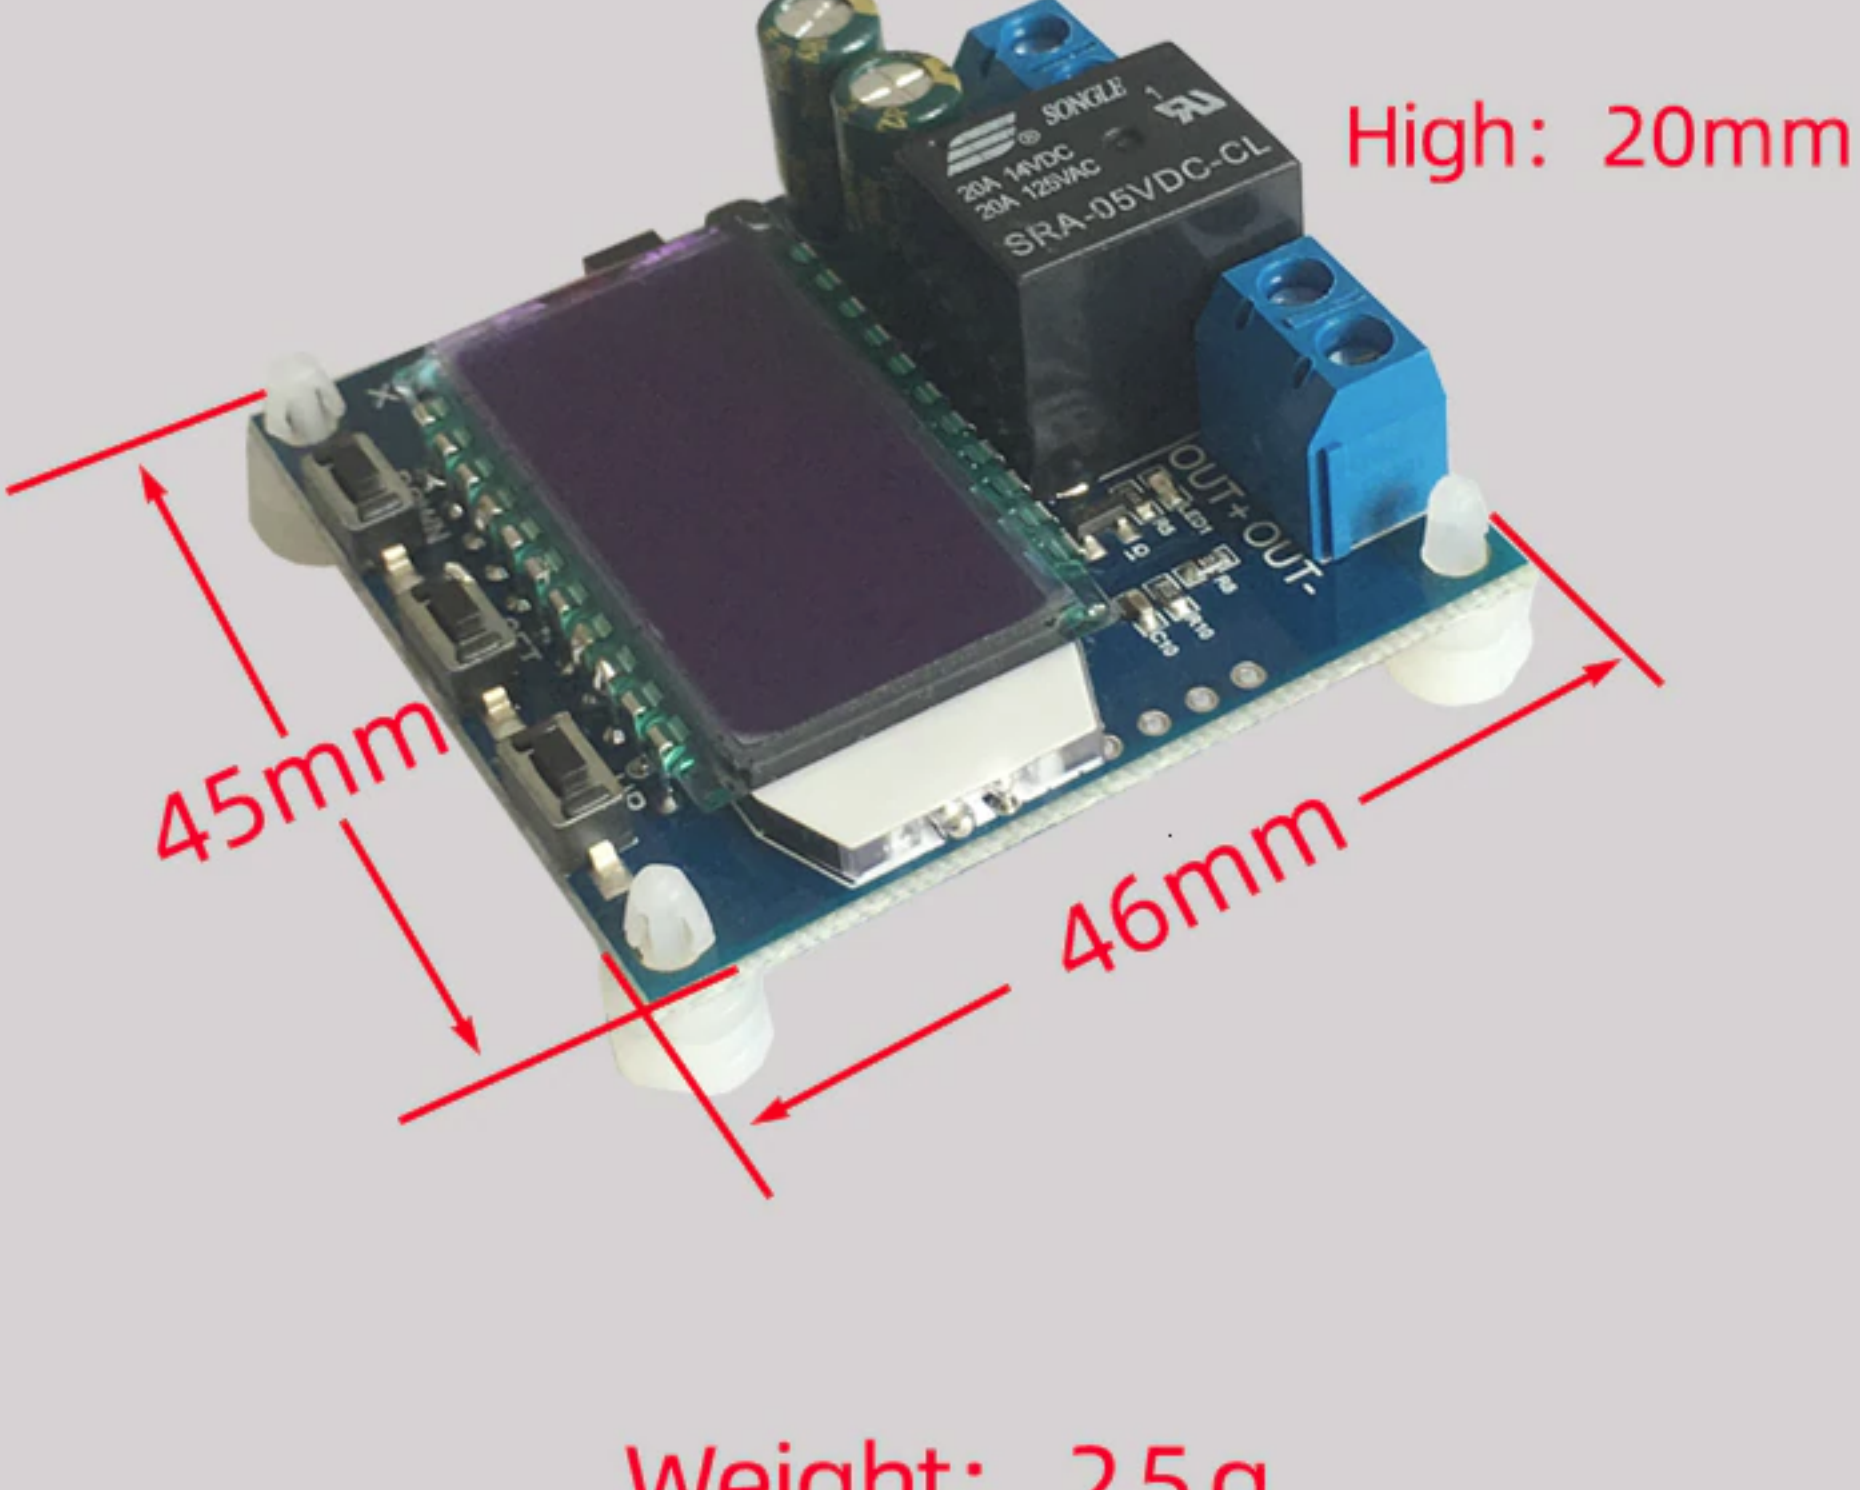

Power System PER: CNC constant voltage and current, which can charge all kinds of small rechargeable batteries

Physical Drawing of Battery Under-voltage Protection Wiring

Product size

Weight: 25g
